Infect. Immun. 65:4972-4977(1997).

-i- FUNCTION: MEMBER OF THE TWO-COMPONENT REGULATORY SYSTEM IRLR/II

-i- FUNCTION: MEMBER OF THE TWO-COMPONENT REGULATORY SYSTEM IRLR/II

RESISTANCE. PROBABLY ACTIVATES IRLR BY PHOSPHORYLATION.

-i- SUBCELLULAR LOCATION: Integral membrane protein. Inner membrane
                                                                                                                                                                     InterPro;

PATHWAY: Tryptophan biosynthesis; first step.

SUBGUNIT: TETRAMER OF TWO COMPONENTS I AND TWO COMPONENTS II.

SUBCELLULAR LOCATION: Chloroplast (Probable).

MISCELLANEOUS: COMPONENT I CATALYZES THE FORMATION OF ANTHRANILATE USING AMMONIA RATHER THAN GLUTAMINE, WHEREAS COMPONENT II PROVIDES GLUTAMINE AMIDOTRANSFERASE ACTIVITY.

SIMILARITY: BELONGS TO THE ANTHRANILATE SYNTHASE COMPONENT I
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  FAMILY.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         d. No. is the number of results predicted by chance to have a
re greater than or equal to the score of the result being printed,
is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        nucleic search, using sw model
